MICRO

**LIGHTWEIGHT
TRAFFIC CONTROL
SOLUTION**

**A HISTORY OF
INNOVATION** >>>

MICRO

The Micro is designed to be a lightweight and compact solution. The angled design presents the control panel at the operator's working level. The lower battery compartment can accommodate 2 x 12v or 2 x 6v battery packs. There is an optional built in battery charger with an external power input connection. These are of a galvanized steel and riveted construction as standard with customer colour schemes as a cost option. It has an integrated transport handle. A 4 way system on a trailer remains below the 750kg weight limit (Depending on specifications).

VEHICLE SIGNAL HEAD

This 3 aspect one piece design in UV stable polyethylene ensures robust and durable performance levels. Individual aspect doors allow greater access to internal electrical and mechanical areas for ease of maintenance. Optics are the very latest LED low energy designs and are capable of automatic dimming and current monitoring. It features the new generation of in head vehicle detectors, purposely positioned above the red aspect for greater monitoring. The signal also has a protective recess for the antenna and signal dimming sensor.

PEDESTRIAN SIGNAL HEAD

This 2 aspect one piece design in UV stable polyethylene ensures robust and durable performance levels. Individual aspect doors allow greater access to internal electrical and mechanical areas for ease of maintenance. Optics are the very latest LED low energy designs and are capable of automatic dimming and current monitoring. The signal also has a protective recess for the antenna and signal dimming sensor.
