

50NHH

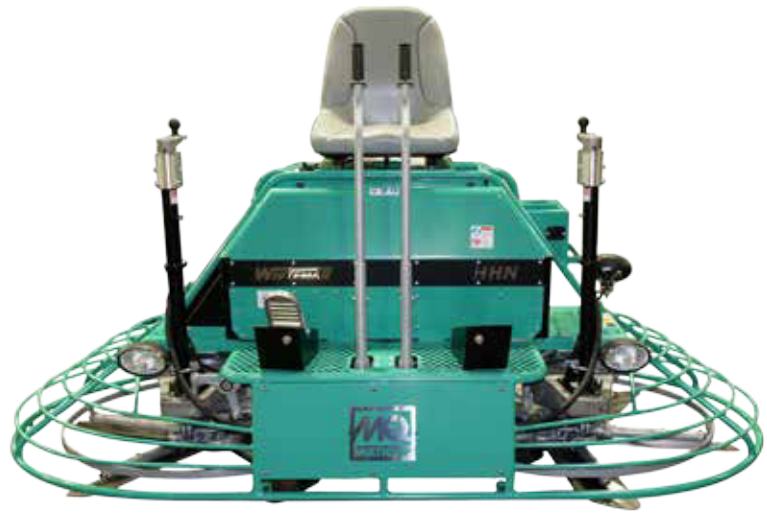

MQ WHITEMAN

Continuing the tradition.

Multiquip introduces the **MQ Whiteman HHNG5** mechanical ride-on power trowel. The HHN is powered by a 35 HP Briggs and Stratton Vanguard Air Cooled V-Twin Big Block and includes several new features that raise the bar for performance.

- **New Engine:** Powered by a 35 HP Briggs and Stratton Vanguard Air Cooled V-Twin Big Block that meets EPA Phase 3 standards.
- **Continuously Variable Transmission (CVT):** Provides superior performance by continually adjusting the drive ratio to obtain optimum torque and speed during all phases of finishing from low speed high torque to high speed burnishing.
- **Helical Gearboxes:** The industry's most efficient, coolest running trouble free design, and we back this with a Three Year Warranty.
- **Optimal Rotor Speeds:** Proprietary tuned CVT and Helical gearboxes offer the industry's most efficient trouble-free design and rotor speeds of 0-180 RPM.
- **TwinPitch Control:** Enables the operator to simultaneously control the pitch of both rotors with minimal effort yet still allows for individual pitch control.
- **Steering Assist:** Prevents operator fatigue and makes controlling the machine remarkably easy even with float pans.
- **Automotive CV-Joints:** Ensures smooth and consistent power is transferred to the gearboxes.
- **Low Vibration Design:** Engine isolation mounts minimize vibration transferred through the frame and help extend the life of key components and improve ergonomics.
- **Four 55 watt Hella halogen lights:** Provide class leading illumination for nighttime and indoor work.

Specifications:	
Model	HHNG5
Engine	Vanguard
HP (kW)	35 (26)
Blades per Rotor	5
Rotor RPM	0 - 180
Path Width in. (cm)	92 (233)
Fuel Capacity gal	5
L x W x H in (cm)	95x48x59 (318x165x145)
Operating Weight lb(kg)	1083 (491)
Optional Wheel Kit	EMR2 EMR3
