

The new LD6

Hydrostatic Drive Power Trowel

**Compact Size.
Exceptional Performance.
Unparalleled Durability.**

www.multiquip.com

The new MQ Whiteman LD6 is the only fully hydrostatic 6-foot ride-on trowel in the market today.

Incorporating a proportional servo controlled pump and high torque drive motors, the LD6 can achieve performance levels unmatched in the industry by any 6-foot ride-on trowel.

- **23 HP Briggs & Stratton V twin engine.**
- **Fully Hydrostatic drive** produces efficient power transfer while keeping maintenance costs to a minimum. System eliminates wear items like belts, clutches and driveline components.
- **Poclain pump and Parker drive motors** ensure optimum torque for panning, while delivering the efficiency required for high speed burnishing.
- **Proportional hydraulic steering** offers quick response with minimal operator effort.
- **Improved stability** — Engine placement lowers overall center of gravity and reduces frame roll.
- **Rebuildable spider assemblies** reduce maintenance costs.
- **Electric linear actuators control pitch** for precision blade pitch control.
- **Ergonomic controls** reduce operator fatigue and enhance productivity.

Frame stability and overall weight distribution is ideal for deck work.

OPTIONAL ACCESSORIES

- A** **Lighting kit** with 6 LED lights, wiring harnesses and hardware (LD6LK).
- B** **Arm rest kit** for increased operator comfort (21868).
- C** **3 gallon retardant spray system** includes water tank, spray buttons and required hoses and hardware (LD6SK).
- D** **Edger kit** converts the LD6 into an edging trowel (LD6EK).

Model	LD6
Engine	Briggs & Stratton (Gas)
HP (kW)	23 (17)
Blades Per Rotor (2)	4
Rotor RPM	0-140
Path Width in. (mm)	75 (1905)
Fuel Capacity gal. (L)	4 (15)
L x W x H in. (mm)	75 x 36 x 55 (190 x 91 x 139)
Operating Weight lb. (kg)	865 (393)
Optional Wheel Kits	EMR2, EMR3
